SUMMARY

Software Developer experienced in building full-stack and AI-powered applications using Next.js, TypeScript, Node.js, PostgreSQL, and MongoDB, with expertise in LLM integration, real-time systems, authentication, concurrent workflows, and scalable backend architecture.

EDUCATION

Delhi Skill and Entrepreneurship University , New Delhi	2021 – 2025
B.Tech, Computer Science and Engineering	CGPA: 8.10

EXPERIENCE

Quick ERP Software Solutions	Jul 2025 – Present
-------------------------------------	--------------------

Software Developer

- Built and deployed a full-stack CRM platform automating employee onboarding, offboarding, and administrative workflows across the organization.
- Architected Role-Based Access Control (RBAC) and Kanban-style task management systems, enabling secure authorization, workflow tracking, and team collaboration.
- Integrated OpenAI-powered task summarization and progress reporting, reducing manual reporting effort and improving managerial visibility.

Userology	Jan 2025 – Jun 2025
------------------	---------------------

Software Developer Intern

- Built an AI-powered interview platform supporting interview-guide generation, transcript analysis, and interviewer workflow automation, improving productivity by **20%**.
- Engineered a scalable tree-based message versioning architecture supporting branching, editing, deletion, and navigation across AI conversation histories.
- Designed a session manager supporting parallel AI chat sessions, maintaining isolated state and preventing conflicts across concurrent interviewer workflows.
- Technologies: Next.js, TypeScript, Node.js, Express.js, PostgreSQL, AWS S3, JWT, Tailwind CSS.

Anchorage	Jan 2024 – Dec 2024
------------------	---------------------

Software Developer Intern

- Developed a hotel operations platform supporting booking, guest management, food ordering, and self-check-in workflows.
- Implemented real-time food ordering and self-check-in using Socket.IO, streamlining guest experiences and operational processes.
- Improved operational efficiency by **33%** while reducing manual workload by **40%**.
- Technologies: Next.js, TypeScript, React Native, Node.js, Express.js, PostgreSQL, Socket.IO, Tailwind CSS.

PROJECTS

CVMindAi	Live Link
-----------------	-----------

- Built an AI-powered resume builder with customizable LaTeX templates, live PDF preview, source-code editing, and direct PDF download.
- Developed an AI chat interface that streams LaTeX code updates in real time from natural-language requests and dynamically updates the compiled resume preview.
- Engineered resume project lifecycle management with archive, restore, soft delete, hard delete, and persistent project storage.
- Technologies: Next.js, TypeScript, Node.js, MongoDB, LaTeX, OpenAI API, OAuth, JWT, Tailwind CSS.

QuizMind AI	Live Link
--------------------	-----------

- Built a real-time AI quiz answering system handling concurrent requests with sub-second response times using FastAPI and asynchronous execution.
- Implemented MCQ-aware prompt engineering with subject-context optimization to generate accurate option-only responses.
- Designed a stateless and scalable backend architecture with REST APIs and AI orchestration using OpenAI and Gemini APIs.
- Technologies: Next.js, TypeScript, FastAPI, OpenAI API, Gemini API.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, C++, C, SQL, PHP, Go.

Frontend: Next.js, React.js, React Native, Tailwind CSS, NativeWind CSS, HTML, CSS.

Backend: Node.js, Express.js, FastAPI, Socket.IO, REST APIs.

Databases: PostgreSQL, MongoDB.

AI & Cloud: OpenAI API, Gemini API, Prompt Engineering, AWS S3, Docker.

Tools & Security: Git, GitHub, OAuth, JWT, LaTeX.

LEADERSHIP & ACTIVITIES

- Secretary, COPs — Led initiatives to improve competitive programming participation and technical skill development.
- Active Member, Training & Placement Student Council — Coordinated placement activities and student engagement initiatives.
